PERSONAL INFORMATION

Birthdate:

June 15, 1994

Nationality:

American

Mother tongue:

English

German language level:

B1

Gender:

Non-binary, they/he

PROFILE

I'm a software engineer with strong communication and organization skills seeking a team-oriented and ambitious work environment after 8 years in the industry. I value emotional intelligence, flexibility, default accessibility, and user delight. In my past jobs, I've proven my ability to use a creative, analytical, and compassionate mindset to help a company function more efficiently and behave more kindly than when I found it. I'd love to learn more about what your needs are and how I can help contribute to the success of the company.

WORK EXPERIENCE

Software Engineer

AmTrust Financial

December 2024 – today

C# › SQL › APIs › .NET › TypeScript

Saved my team 40 development hours every week by initiating and converting developer testing from extensive manual UI tests to automation suites using AI and Playwright's MCP server. Automation saved screenshots, JSON request files, and documents with dynamic naming and compared HTML file results. Collaborated on cross-functional teams ranging in size from 8 to 24 to convert a massive codebase into multiple APIs divided by business.

Engineering Mentor

Tech Elevator

August – October 2023

Java › PostgreSQL › Vue.js › Git › APIs

Spearheaded a short-term project to help bootcamp graduates improve engineering skills such as Git, calling and maintaining APIs, and transforming business requirements into an ERD for a relational database through making a "city tours" app from scratch using the Google Maps API. Led daily remote pair programming and individualized lessons. Created a Kanban board of detailed, contextualized tickets with minimal task dependencies.

Software Engineer

Within3

May 2020 – April 2022

Ruby › Rails › JavaScript › SQL › VirtualBox

Collaborated on a cross-functional Agile team to maintain, add features to, and implement redesign details on a large codebase using Jira. My greatest pleasure was creating tooling that minimized friction, streamlined manual processes, and improved UX for internal and external users. My work permitted medical researchers, advisory boards, and organizations to gather data on medications, processes, and symptoms during the pandemic.

Web Developer

WiredViews

June 2018 – March 2020

C# › ASP.NET › SQL › Angular › JavaScript › Azure

Worked independently in an agency setting to create websites of varying complexity, from nonprofit event management and engagement to an externally and internally facing corporate CMS and blog where I facilitated imports and integrations among six backend third parties. Utilized Azure functions, deployment environments, databases, pipelines, and other Devops. Acted as a primary contributor on a successful pitch to a potential client.

AI PROJECTS

Level 2: Personal Assistant February 2026 Created a personal assistant using vectors in a database, a Telegram bot, and AI inference	Level 3: Calendar App March 2026 Write prompts and review AI's PRs to create a calendar application integrated with my personal assistant.	Level 4–5: Book Club App April 2026 Had AI create and manage work items, PRs, continuous integration with minimal human input.

FORMAL EDUCATION

Java Coding Bootcamp 2018 Tech Elevator	Bachelor of Arts – German Language Bachelor of Arts – Film Production 2016 Bowling Green State University Studied abroad at the Paris-Lodron Universität in Salzburg, Austria
--	---

AWARDS

Business proposal from Hackathon

First place winner at a hackathon out of 11 teams in April of 2018 with an unexpected ensuing business proposal.

TECHNICAL KNOWLEDGE

Languages: C#, JavaScript, TypeScript, Ruby, SQL, Java	Frameworks: (ASP).NET, Rails, React, Angular, Vue.js
Tools & Cloud: Git, Jira, Playwright, VirtualBox, Azure DevOps, functions as a service	AI: use of MCP Servers, vector databases, system prompt efficiency, and building skills, hooks, prompts, and agents
Methodologies: Agile / Scrum, pair programming, Kanban	Human Languages: English (native), German (B1)
